

February 10,2013

Dear Mr. Goze,

As the owner's representative for the Peter Christensen Dental Campus in Lac du Flambeau, WI, I am happy to write a letter of recommendation for MAG Mechanical.

As you know in Dentistry and Health Care we are dealing with a lot of aerosols from the oral cavity, often in confined operatories, so I am most happy that MAG could build a 100% outside air system that can bring in 30,000 cu.ft. of fresh air every second into the building. This is a great benefit for our staff as well as our patients in our 36,000 sq. ft. facility!

It is also surprising that you were able to accomplish this while reduce our propane use 90% and reducing our need for six air handlers down to one which should result in significant energy savings.

So far the system has proven to be very comfortable with evenly distributed heat and air flow even on the coldest days. I truly believe this is the most efficient system that I.H.S. has ever seen and one on of the most efficient systems in Indian Country!

I appreciate your willingness to work with our TERO officer and for hiring several of our Tribal members.

It is nice to see a Native owned and operated firm that is so professional! I'd like to thank all of your employees for being so cooperative and for their high standards which made my job a bit easier.

I would encourage anyone to consider MAG Mechanical for their project and welcome anyone to call me if they have any questions or stop by for a site visit.

Again, I can't thank you and your staff for the great service and compassion you have shown the Lac du Flambeau Tribe!

Sincerely,

Paco Fralick, DDS
