RE: Letter of Endorsement

Dear MAG Mechanical, LLC,

I would like to begin, by thanking you for your mechanical services provided at the Lac du Flambeau owned and operated Peter Christensen Dental Campus. As you know, the Lac du Flambeau Band of Lake Superior Chippewa Indians are to be modeled and are industry leaders when it comes to trying to improve the way of life for our Native people. A big part of what makes this possible is working with companies like MAG Mechanical, a Native American owned and operated firm that portrays a professional work ethic and positive attitudes.

I am excited to inform others, that we have one of the highest efficient buildings in the country and the highest efficient building in Indian Country and through-out the Indian Health Service Regions. This building is and will be a great asset for our people for years to come. I am extremely impressed that the dental clinic has 100% fresh-air being pushed through it at all times of operation. I understand that the other day when it was below zero outside, the entire facility was kept at ideal temperature with only 40% of each boilers capacity being used. This will save the clinic and tribe a great deal in utility expenses over the life of the building.

Your willingness to work with our tribal members and interest in trying to teach them a life-long skill set is second to none. I would like to see all the contractors that work on our land follow your high standards and goals.

I know that you have spent time looking at some of our other facilities here in the area and hope that we can incorporate the same high efficiencies and high quality systems that are installed at the dental clinic in those buildings.

We look forward to working with MAG Mechanical in the future and wish you the best of luck.

Tom Maulson, Tribal President
